STEEL FABRICATORS

COMPANY OVERVIEW

Mobbs Engineering was first established in 2007 to meet demands from local companies for a reliable engineering company to supply quality products and service.

Mobbs Engineering was originally established as an owner operator business providing onsite boilermaking services, however due to the quality workmanship and service provided, there was soon the demand to open an Emerald based Engineering/Fabrication workshop helping to meet tight time constraints by being local without compromising on safety and quality.

Today Mobbs Engineering employs around 23 people providing a service to all industries, including Mining, Gas, Agriculture, Rail, Council and Commercial, we pride ourselves on having a quality skilled workforce and have an excellent reputation in the region, we are a trusted, competent, reliable team.

Our experience has seen Mobbs Engineering's client and skills base grow and therefore we are ideally placed to provide services from design and drafting, engineering certification, fabrication, statutory inspections and reporting, general repairs, industrial coatings auditing, sodablasting and painting to our clients' specifications.

CAPABILITIES

Mobbs Engineering pride ourselves on being able to offer our customers a solution to all of their requirements. Through continued improvement and experience we are continually expanding our capabilities that we are then able to offer to all of our customers.

Mobbs Engineering's Emerald based facility consists of a 570m^2 workshop on a 10,000m^2 block.

Our recent alliance with Sencova* Steel Fabricators has significantly broadened our capabilities placing almost no limit on the size of your project.

SERVICE AREA

Situated in the centre of the Bowen Basin, Mobbs Engineering is capable of servicing all surrounding mine sites. From our Emerald base we provide services west to Alpha, north to Moranbah, east to Blackwater and south to Rolleston. Our highly qualified boilermakers and industrial painters can be deployed at short notice. With major logistic companies based in Emerald, transport is easily arranged for same day collection and delivery.

Our mobile welding and blast & paint units are fully stocked with consumables and are available to service our customers' needs wherever needed and can be used on a daily depot to depot basis within our current service area.
