<b>Phone</b>	(07) 49 824 403
<b>Company Director</b>	Tony Mobbs
<b>Email</b>	<a href="mailto:enquiries@mobbs.engineering">enquiries@mobbs.engineering</a>

## **2. Company Overview**

Mobbs Engineering was first established in 2007 to meet demands from local companies for a reliable engineering company to supply quality products and service. Mobbs engineering was originally established as an owner operator business providing onsite boilermaking services, however due to the quality workmanship and service provided by Tony Mobbs there was soon the demand to open an Emerald based Engineering/Fabrication workshop helping to meet tight time constraints by being local without compromising on safety and quality. Today Mobbs Engineering employees around 18 people providing a service to all industries, including Mining, Gas, Agriculture, Rail, Council and Commercial, we pride ourselves on having a quality skilled workforce and have an excellent reputation in the region, we are a trusted, competent, reliable team.

Our experience has seen Mobbs Engineering's client and skills base grow and therefore we are ideally placed to provide services from design and drafting, engineering certification, fabrication, statutory inspections and reporting, general repairs, and sandblasting and painting to our client's specifications.

Mobbs Engineering's Emerald workshop has a large all weather gravel yard along with a fully enclosed, secure 360m<sup>2</sup> workshop and a semi attached 120m<sup>2</sup> covered open high bay area. This workshop/Yard area has been capable of handling varied tasks from small fabrication to repairs and overhauls of large mining equipment including large loader and excavator buckets and also large underground equipment such as Continuous Miner heads and Mobile Boot Ends. Mobbs Engineering also has access to a large gravelled all weather work pad allowing us to work on any large equipment with no limit to the size of the equipment.

### **3. Our Values**

As a local Emerald based company we value the community and always engage local companies for external services and employ locally whenever possible. Our reputation is our greatest asset and to maintain our reputation with our customers, employees and the local community we take our company values very seriously and will not jeopardise our reputation by disregarding any of our values at any time.

#### **Our Values**

- Mine site compliant Welding Trailers
- Mine Site compliant vehicles
- Flat Bed Truck
- Workshop Mig Welders
- Workshop TIG Welder
- Gas Cutting and Heating units
- Plasma Cutters
- Metal Band Saw
- Punch and Sheer Machine
- Hydraulic Press
- Pipe Bender
- Drill Press
- Metal Lathe
- Air Compressors
- Fork Lifts
- Sand Blast Booth
- Spray Paint Booth
- All Boilermaking associated tooling

## **6. Customers**

### **Tier 1**

- BMA, Blackwater, Broadmeadow, Gregory and Crinum
- Rio Tinto, Kestrel
- Anglo America, Moranbah North
- Ensham Recourses
- Caledon, Cook Colliery

### **Tier 2**

- Downer EDI Mining
- Downer EDI Blasting
- Orica
- Monadelphous
- UGL
- Hasting Deering
- Komatsu
- Modular Mining Systems
- HSE Mining
- Hughes Drilling

## 7. Service Area

Currently Mobbs Engineering provides our fabrication and site maintenance services over a large area. From our Emerald base we provide services west to Alpha, North to Moranbah, East to Blackwater and south to Rolleston. We are always looking to expand our coverage area and with major transport companies based in Emerald delivering and picking up daily from our workshop we are ideally placed to provide a timely delivery to our customers. Same day pickup and delivery can be arranged with major transport companies and we also offer our own Truck for transport of equipment up to 9 tons.

Our mobile welding units are fully stocked with consumables and are available to service our customers' needs wherever needed and can be used on a daily depot to depot basis within our current service area.

## 8. Brief Portfolio

The following portfolio shows a broad range of the diversity of work we have previously conducted in our Emerald workshop and on our customers work site.

New Kress Hauler Engine Canopy fabricated for BMA

New Reclaimer Shovels fabricated for BMA

Underground Cassette Racker, Repaired including Statutory inspections and reporting for Rio Tinto.

New Ventilation Fan.

Kress Hauler Swing Frame sandblasted ready for Paint. Refurbishment and strengthening kit added As per OEM Specifications.

250 ton Excavator Bucket rebuild including new Adaptors and GET, Heel Plates, Crack Repairs and Line Boring.

Parts Cages designed and fabricated to suit Customer requirements

Custom Stainless Steel Cabinet

Komatsu 930E Tray rebuild carried out onsite.

Replacement Mudguard and Radiator Cowling fabricated and fitted without any need for modification

The photos above are a very broad overview of the fabrication and repair work Mobbs Engineering offer our customers. At Mobbs Engineering we pride ourselves on being able to supply a quality on time and on budget service and are always looking for new challenges to broaden our experience and offered services.
